Caliban Incorporated Aeronautical solutions

formed some sixty ears ago on Earth as a a small private airline, running charter flights the company branched quickly and grew rapidly due too careful and professional management. With offices on many cities and generally at least agents in every major city who can be contacted it is one of the largest freight and aeronautical companies trading today. Most of there ground crews and non commercial work is carried out by franchises.

Caliban Inc – Mars Franchise

in recent years the company has developed a small fleet of space worthy vessels, this lead too the company too turn its gaze mas wards. When the offer from Hariet Quimby came through too set up a

franchise on Mars the offer was too good too resist and it was taken, resulting in the forming of the single most expensive franchise operation in the companies history.
